## WORKERS COMPENSATION REFORM

**“Making Ohio More Competitive”**

### COALITION FORM

As work environments become safer, the number of workers compensation claims continues to decline. At the same time, the cost per claim has continued to rise along with the cost of health care in general, making costs to businesses substantial. Along with taxes, workers compensation is something every business owner must handle.

Ohio is one of only four states that still have a state-controlled Workers Compensation Program. Let's make Ohio more competitive with our neighboring states, start a discussion, and open the path to business-friendly reform.
